

SOS Xcode User Guide

Software Specifications (As of 02 Dec)

- Xcode: Ver 11.1
- macOS: Mojave or higher
- CocoaPods: Ver 1.8.4
 - <https://cocoapods.org/>
 - Pods: Google Analytics, Firebase Firestore, Firebase Auth
- Swift 5

Clone the repository

<https://github.com/hamfox/save-our-species>

- `$ git clone https://github.com/hamfox/save-our-species.git`
- `$ cd save-our-species/SOS`

Open the project

- `$ open save-our-species.xcworkspace`

Add the Firebase configuration file

<https://firebase.google.com/docs/ios/setup>

- Download GoogleService-Info.plist by right clicking on it in the Final Stuff Drive folder and clicking Download
- Place it into `/save-our-species/SOS/save-our-species/`
- Drag the file into `/save-our-species/SOS/save-our-species/` inside Xcode

Build the project

- Select the iPhone 11 Pro Max device at the top
- Hit the play button and wait for the build to complete

- Note: this could take several minutes depending on the speed of the machine.

You should now be able to use the app on the simulator

- Please review Working Prototype Known Problems Report document before using
