Sprint 1 Plan

Heading:
Product name: SOS (Save Our Species)
Team name: MarineVP
Sprint completion date: Sprint 1: 10/7-10/21

Goal: We want to have a basic framework developed in swift that allows a public user to create a stranding instance. This standing instance will then be viewable by the client. This instance should include a text description of the animal, the situation and the location.

Task listing:

User story 1:
(13) As a marine organization, I want people to be able to report a marine mammal stranding to us so that we can respond faster and be more prepared.
User story 2:
(8) As a user, I want an intuitive tool to be able to report when I find a marine mammal stranding so that I can report these incidents more conveniently.

User story 3:
As a team member of SOS, I

Team roles:
Scrum master: Harrison Fox
Project owner: Ashely Pauley
Developers: Everyone

Initial task assignment:
Set up Github repository
Set up Trello and assign tasks to group members
Set up Figma to start to wireframe
Set up Slack to communicate
Create Firebase account
Create Google Slides presentation
Create sprint plan 1
Create Release Plan
